Careers

MANAGER SOFTWARE DEVELOPMENT

POSITION SUMMARY: Responsible for Managing & leading the Software Solution Development team to design, develop, implement, troubleshoot and optimize Enterprise grade software products and services of Telecard. He works to develop short- and long-term strategies for technology development to manage scalable software products.

KEY RESPONSIBILITIES: Provide technical leadership to teammates through coaching and mentorship to design and development of software products meeting the requirements and business needs of stakeholders. Interface with internal/external customers to understand requirements, set priorities, and communicate direction and progress. Maintain high standards of software quality by establishing best practices and habits. Manage and execute the project plans ensuring the timely delivery of the software products and upgrades. Ensure troubleshooting and resolution of issues throughout the product life cycle including out of business hours support for incident resolution. Ensure that the team's technical product documentation/manual is always complete, accurate and coherent. Assist in the collection and documentation of user's requirements, development of user stories, estimates and work plans. Prepare and present weekly progress report to the department head stating the status of various ongoing projects. Recruit, mentor and manage an effective software engineering team at different levels of experience. Participate in peer-reviews of solution designs and provide technical knowledge and insight to peers and colleagues. Collaborate with other technical and business leads of the company to plan, design, develop, test, and maintain web- and desktop-based business applications that can enhance the revenue streams. Work with department head for strategic direction and roadmap to new project and timelines. Learn new technologies and keep abreast of existing technologies and help introduce them where appropriate.

REQUIRED QUALIFICATIONS AND SKILL SET: Graduation in Computer Science with 5 years' Experience as a Software developer including 2 years of a lead position. Experience of designing and developing enterprise grade software. Proficient in various programming languages & frameworks especially, Laravel/PHP/React/Next.js. Experience of Database structures and algorithms. Comprehensive understanding of object-oriented and service-oriented application development techniques and theories. Strong communication skills with both internal team members and external business stakeholders. Strong initiative to find ways to improve solutions, systems, and processes. Understanding of cloud hosted SAAS (Software as a Service) industry.

SOFTWARE BUSINESS ANALYST

POSITION SUMMARY: Responsible for bridging the gap between clients' needs and software development team. The BA will gather and analyze requirements, document processes, and ensure the successful delivery of projects.

KEY RESPONSIBILITIES: Requirements Gathering - Work closely with stakeholders to gather, analyze, and document business requirements and translate them into technical specifications for the development team. Process Analysis - Evaluate current business processes, anticipate requirements, identify areas for improvement and recommend solutions that enhance efficiency and effectiveness. Documentation - Create detailed documentation including business requirements, functional specifications, use cases, and user stories. Stakeholder Communication - Act as a liaison between the business stakeholders and the development team, ensuring clear and effective communication throughout the project lifecycle. Project

Support - Provide support to the project management team in planning, execution, and monitoring of software development projects. Testing and Validation - Collaborate with QA teams to develop test plans and conduct user acceptance testing (UAT) to ensure the software meets business requirements. Training and Support - Assist in the development of training materials and provide training and support to end-users. Continuous Improvement - Stay updated with industry trends and best practices in business analysis and software development, and apply this knowledge to improve processes and deliverables.

REQUIRED QUALIFICATIONS AND SKILL SET: Academic - Bachelor's degree in Business Administration, Computer Science, Information Technology, or a related field. Professional certifications such as Certified Business Analysis Professional (CBAP) or PMI Professional in Business Analysis (PMI-PBA) will be a Plus. Experience - Minimum of 2 years of experience as a Business Analyst in a SW development environment. Technical Skills - Proficiency in BA tools and techniques. Familiarity with software development methodologies (Agile, Scrum, Waterfall) and project management tools (JIRA, Trello). Communication Skills - Ability to effectively communicate complex concepts to both technical and non-technical stakeholders. Analytical Skills - Strong analytical and problem-solving skills with attention to detail and accuracy in work deliverables. Interpersonal Skills - Strong interpersonal and collaboration skills. Ability to work effectively in a team-oriented environment.

PRESALE & SUPPORT ENGINEER

KEY RESPONSIBILITIES: Provides technical direction for the development, design, and systems integration for client engagement from definition phase through implementation. Responsible for gathering business requirements of enterprise customers by coordinating with Customers and Sales Team. Summit – Telecard LTD

Source: <https://www.telecard.com.pk/summit>

Summit - Virtual Audio Conference Bridge

Conversation and collaboration are vital to all businesses, especially as remote work becomes more of the norm. But choosing the right audio conference service can be difficult. With Telecard SUMMIT, from small internal brainstorming to international, company-wide meetings, we offer secure audio conferencing for businesses of all sizes.

Enjoy the security and convenience of dedicated conference lines and customizable numbers. Only participants with your unique phone number can enter the call. Our audio conferencing services help you maintain brand continuity through every client interaction. It's your line and your unique phone number. It never changes!

Browse our huge inventory of domestic and international conferencing numbers, including area codes that are historically difficult to obtain. You get to choose a dedicated phone number that reflects your business and brand identity.

At Telecard SUMMIT, we believe in clear communication first and foremost, which is why providing you with a high-quality audio bridge is our top priority. When it comes to additional features, you'll find that many other companies force callers to install browser extensions and initiate complicated webcasts in order to simply join calls. We're just not that kind of audio conferencing service.

Once a high-quality audio bridge conference is initiated, all of our conferences include free premium features like screen sharing, recording, and PIN-free dial-ins. There are even options like Lecture Mode so you can have full control of your conference calls, no matter how large they are. Get dedicated conference lines and unique phone numbers for all your business meetings. Less complicated. More professional.
